Agriculture

Information on farming and related topics in New York State — including crops grown, livestock raised, dairy production, and the economic importance of agriculture.

Highlights

- In 2014, there were 35,500 farms in New York, down from 36,000 in 2010.
- Leading vegetable crops for fresh market use in 2012 were cabbage, cauliflower, cucumbers, onions (summer storage), pumpkins, snap beans, squash, sweet corn, and tomatoes.
- New York's 615,000 milk cows produced almost 1.2 billion pounds of milk in December 2014, or 1,890 pounds per cow.
- Apple production totaled 1,295 million pounds in 2014, down from 1,410 million pounds in 2013.
- New York's egg-laying chicken population was about 5 million at the end of 2014; they produced over 1.5 billion eggs during the year, for an average of 296 eggs per chicken.

a For area planted, see Corn for Grain.

1 Area planted includes corn planted for both grain and silage.

2 Marketing year average price.

3 All hay price are based in weighted sales, not production.

4 Forage production is the sum of all dry hay production and haylage/greenchop production after converting the haylage/greenchop production to a dry equivalent basis.

a Survey was not conducted in April and July, resulting in no milk cow and milk per cow data for March through June 2013. 2013 annual totals include modeled data.

1 Includes dry cows; excludes heifers not yet fresh.

2 Excludes milk sucked by calves.

3 Detail may not add to totals. The yearly and monthly averages are determined by dividing milk production to number of cows. As such, monthly averages may not add to yearly averages.
